

## **Rob Anderson**

Rob Anderson is the Director and a Principal Consultant at Anderson Hall Pty Ltd. He began full-time consulting when he joined Hall Technical Pty Ltd in 2014 after a 21-year career in full-time research at the University of Adelaide, where he currently holds the title of Adjunct Associate Professor.

During his research career, he oversaw the development of a test facility for testing vehicles for pedestrian safety for the Australasian New Car Assessment Program, and developed expertise in pedestrian kinematics and pedestrian injury biomechanics. He has published over 150 reports, journal articles, and conference papers on road and vehicle safety, impact injury biomechanics, head injury, pedestrian crash kinematics, and crash mechanics generally. Since 2014, Rob has provided expert reports full-time, providing opinions based on accident reconstruction and injury biomechanics in a wide range of types of accidents, including road accidents, workplace accidents and falls.
